

Practice Test 3

Dividing Large Numbers - Year 6

Name: _____

Date: _____

No calculator. Show your working in the squared boxes - the squares help keep your digits in columns. Use whichever method you like (short division, long division or factors) unless the question says otherwise.

Score: _____ / 31

Section A: Key words and estimating

A1 Look at this calculation: $7,068 \div 31 = 228$

(2 marks)

Which number is the divisor? _____ Which is the quotient? _____

A2 **Estimate** the answer to $5,876 \div 32$ by rounding both numbers. Show what you rounded to. (1 mark)

Estimate: _____

Section B: Short division (1 mark each)

B1 $4,872 \div 6$

B2 $7,236 \div 9$

B3 $1,995 \div 5$

B4 $6,328 \div 8$

$$=$$

$$=$$

Section C: Dividing by a 2-digit number (2 marks each)

C1 $9,078 \div 34$

C2 $4,896 \div 17$

Answer:

Answer:

C3 $7,511 \div 37$

C4 $6,624 \div 48$

Answer:

Answer:

Dividing Large Numbers

Name: _____

Date: _____

D1 Work out $2,940 \div 35$ by dividing by 5, then by 7. **D2** Work out $7,056 \div 36$ by dividing by 4, then by 9.

Answer: _____

Answer: _____

E1 $6,215 \div 19$
Give your answer **with a remainder** (r).

E2 $4,100 \div 18$
Give your answer as a **mixed number** (remainder as a fraction, simplified).

E3 $5,358 \div 20$
Give your answer as a **decimal**.

F1 **3,100** people are coming to a concert. Each row seats **45** people. How many rows are needed? (2 marks)

Answer: _____

F2 Cinema tickets cost **£14** each. How many tickets can you buy with **£1,000**? (2 marks)

Answer:

F3 A lorry drives **2,592 km** over **18** days, the same distance each day. How far does it drive each day? (2 marks)

Answer:
