

Standard Form

Answer key · 11 marks total

Section A — Writing numbers in standard form

1. $8\text{ }\mu\text{m} = 0.000008\text{ m (1)} = \mathbf{8 \times 10^{-6}\text{ m (1)}}$
2. $30\text{ nm} = 0.00000003\text{ m (1)} = \mathbf{3 \times 10^{-8}\text{ m (1)}}$
3. $0.000004\text{ m (1)} = \mathbf{4 \times 10^{-6}\text{ m (1)}}$

Section B — Converting standard form back

4. $6 \times 10^{-6}\text{ m} = 0.000006\text{ m (1)} = \mathbf{6\text{ }\mu\text{m (1)}}$
5. $1.5 \times 10^{-4}\text{ m} = 0.00015\text{ m (1)} = \mathbf{0.15\text{ mm (1)}}$
6. $\mathbf{0.00009\text{ m (1)}}$

Marking note: award method marks for correctly counting decimal places even if the final answer contains an arithmetic slip.
